Essential lotion

Base lotion, add 5 to 10 ml of meso solution.

Hyaluronic acid.

Description:

Ultra-refreshing and moisturising lotion to complete the cleansing and to apply before skin care creams. The essential lotion is gel with hyaluronic acid that can be personalized by incorporating meso solutions. Simply add 5 to 10 ml of meso solution in order to create a personalised product for face, hair of body.

Examples:

- 5 ml of F-HAIR to prepare a hair fortifying lotion.
- 5 ml of F-HAIR MEN to prepare an anti hair loss lotion.
- 5 ml of F-ACN to prepare an anti-acne lotion.
- 5 ml of XFC to prepare an revitalizing lotion.
- 10 ml of F-XBC to prepare an anti-cellulite lotion.

How to use:

Apply over the face and neck after cleansing products and then apply a cream. For hair treatments, massage on the scalp every night.

The formula suits all skin types and works in synergy with cabin treatments. Does not contain alcohol.

Scent:

Neutral, perfume free

Product texture:

A liquid lotion with high water binding capacities to increase the skin moisture, complete perfectly the skin cleansing and enhance the penetration of creams and serums.

Vit C micro-water

Lotion with strong anti-aging properties.

ET-Vitamin C.

Description:

Ultra-refreshing and moisturising lotion to complete the cleansing and to apply before skin care creams. Et-Vitamin C is a multi-functional vitamin C derivative with excellent whitening, anti-oxidation, free radical-scavenging and collagen boosting effect. Its stability is superior to other ascorbic acid derivatives. It exhibits strong inhibition effect on melanogenesis, reduces dark spots and age spots, fights photoaging by interfering with inflammatory cytokines and reverse ROS production to achieve free radical scavenging purpose.

The formula suits all skin types and works in synergy with other products. Does not contain alcohol.

How to use:

Apply over the face and neck after cleansing products and then apply a cream.

Scent:

Ceylan tea & citrics.

Product texture:

A liquid lotion with high water binding capacities to increase the skin moisture, complete perfectly the skin cleansing and enhance the penetration of creams and serums.

Deep cleanser

Micro-emulsion technology to remove make-up and impurities without any soap or detergent on the face, eyes and lips. The product is for all skin types .

XS hyaluronic acid.

Description:

The deep cleanser is a melting micro-emulsion to remove the make-up for all skin types. Nourishing and moisturising it is formulated for professional treatments. It can be use on face, eyes and lips. It contains low molecular weight hyaluronic acid to hydrate the skin and reduce the appearance of wrinkles. Yet the feel is light and cool, offering a melting sensation when the product is applied onto the skin, the film residue is fine but noticeable, non-greasy and non-tacky.

Hyaluronic Acid is the most hydrated biopolymer known. In living tissues it serves as a connective tissue organizer and water holding substance. The sodium hyaluronate is coming from a biotechnical safe process; it is free of contaminants and GMO. XS Hyaluronic Acid which is a very low molecular weight hyaluronic acid. It is a breakthrough in anti-aging properties with increased permeation through the skin compared to high molecular weight hyaluronic acid. It rejuvenates the skin by improving its viscoelastic properties and significantly decreases deep wrinkles.

How to use?

The products can be used at home or for cabin treatments. Massage on the face, neck, eyes and lips to remove the make-up, then rince with water.

Scent:

Rose and moka coffee.

Product texture:

Touch and feel are important factors when buying beauty and personal care products. We attach great importance to the texture and comfort of a formulation, focusing on how it feels, and making a link between sensoriality and functionality. Our deep cleanser has unexpected sensoriality, bright, creamy and rich appearance, evanescent feel (light & thin) and the scent is a subtile blend of rose & coffee.

The emulsion offer ultra-soft touch and easy spreadability on the skin which is an essential requirement for a cleanser. These characteristics can be attributed to the very fine and homogeneous dispersion of the oil droplets. The emulsion is homogeneous, with an average droplet size in the range of one micron.

The extreme fineness of emulsion is also our key factor to remove efficiently all types of make-up on the face the eyes or the lips. The product removes completely even the most resistant make-up without any detergent or soap in the formulation. Our deep cleanser offers excellent tolerance profile on skin and mucous membranes and does not sting the eyes or the skin. The product is paraben-free, soap-free and sulfate-free.

Micro-oil cleanser

Bicontinuous cleanser with both oil and water channels, and dissolves oil- and water- soluble components with the highest efficiency.

Description:

A new generation of cleanser half the way between a micellar water and an oil cleanser. It combines both advantages for an efficient cleansing without oily skin feel of cleansing oils. Bicontinuous phase has both oil and water channels, and dissolves oil- and water- soluble components. A technical trend coming directly from Japan.

How to use?

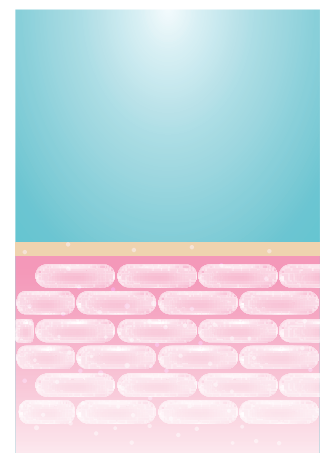

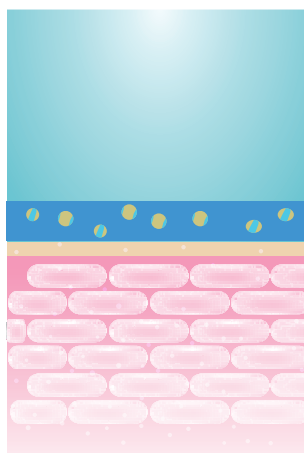

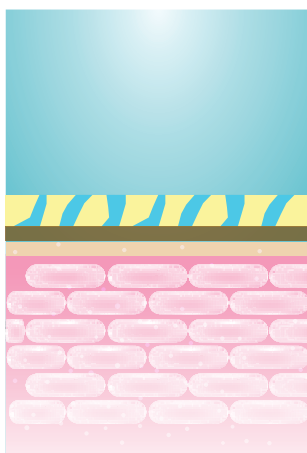

The products can be used at home or for cabin treatments. Massage on the face, neck, eyes and lips to remove the make-up, then rinse with water. The cleanser can also be used in the shower or bath with wet hands.

Scent:

Mandarin essential oil.

Product texture:

The micro-oil feels rich like an oil cleanser but is rinsed off very easily leaving no residue. The formula is called bi continuous as it contains water and oil in equal proportions but looks completely transparent. It forms layers of water and oil. Once applied on the skin makeup is absorbed by the bi-continous cleanser, when rinsed, bi-continuous system emulsifies and washes off completely without leaving any residue.

Hyaluronic peel

Chemical and enzymatic peel to prepare the skin before professional treatments.

Hyaluronic acid, gluconolactone and enzymes.

Description:

In order to improve the skin micro-needling and electroporation treatments we created this pre-peel. Removing dead cells improves the penetration of meso solutions. The hyaluronic peel combines gluconolactone and enzymes for a synergistic exfoliation in a gel formula with hyaluronic acid for a slow dry. Polyhydroxy acids have considerable molecular mass and consists of relatively big molecules. As a result, they penetrate skin gradually, layer by layer. Dead skin cells are removed gently, avoiding skin irritations. Gluconolactone is also a natural antioxidant which is as effective as vitamin C and vitamin E. Gluconolactone blocks the synthesis of pro-interleukin-1 which is responsible for inflammation. The ability of gluconolactone to transfer water molecules plays also a central role in skin moisturising. Getting in the granular layer of skin, water causes calcium ions concentration decline sending signal to the body to stimulate lipid synthesis in keratinocytes.

Exfoliating enzymes gently eliminates the dead cells to reveal younger, healthier looking skin. An enzymatic exfoliant based on a protease obtained by fermentation. Enzymatic action that eliminates dead skin cells to smooth the skin's surface and promote cell renewal. A gentle, enzymatic alternative to AHAs.

How to use?

Apply the product with a fan brush avoiding the eye contours. Leave-on for 5 minutes and remove with humid cotton pads.

Scent:

Neutral, perfume free.

Product texture:

The hyaluronic peel is a hyaluronic gel formula for a slow dry and gentle exfoliation.

Essential cream

Base cream to mix with meso solution to create personalized skincare. Add up to 5 ml of meso solution.

Description:

Unique base cream to prepare personalized treatments with meso solutions. The cream can be personalized depending on the indication. The technology behind the essential cream is a water-in-oil emulsion highly resistant to electrolytes. It easily incorporate any meso solutions. The cream is highly stable with a rich nourishing texture. The perfect skin care after mesotherapy or skin micro-needling. The scent is fresh and energizing, composed of a mixture of citrus fruits.

After preparing the cream it can be stocked at room temperature up to 8 weeks.

How to use?

Add progressively while mixing with a spatula 5 ml of meso solution into the base cream till the cream is uniform. Creams can be stored in fridge and used within 6 weeks.

Scent:

Ceylan tea, fresh citrics.

Product texture:

Rich water-in-oil emulsion with bright and fine texture that can be mixed with any type of Fusion Meso vials to create personalised treatments. It incorporates a specific blend of oils to create a long lasting protective film over the skin. At application the texture feels light and easy to apply, the after-feel is a long lasting nutritive sensation.

Meso lift cream

Powerful lifting cream for daily use concentrated in mesotherapy ingredients.

Cross-linked hyaluronic acid, 5 growth factors, folic acid, acetyl glutamine.

Description:

A cream formulated with mesotherapy and dermal fillers active ingredients for an effective reduction of skin sagging and wrinkles. The cream helps define the contours of the face and give it a more youthful and firm appearance. The cream is white and extremely glossy, ultra-comfortable texture with a satin and fresh after-feel. The scent is fresh and energizing, composed of a mixture of citrus fruits. The cream has to be applied at night on a cleansed skin and can be used in synergy with serums.

How to use?

Wash your face before you apply your night cream. Collect a dime-size amount of the cream. Dab it onto your face. Follow an upward, circular direction to massage the cream on to your skin. Do not apply the night cream on your eye-lids.

Scent:

Ceylan tea, fresh citrics.

Product texture:

The specific composition of this water-in-oil cream leads to optimal emulsion stability while enabling to provide a specific smooth and velvety skin feel. The cream has a very bright and shiny appearance due to the fine emulsion technology used. The result is a very pleasant cream, fresh at application and easily absorbed by the skin.

Meso repair cream

Soothing cream formulated to repair the skin and UV induced DNA damages.

5 growth factors, folic acid, acetyl glutamine, amino acids, peptides and ATP.

Description:

A cream formulated with mesotherapy active ingredients for an effective skin recovery after aesthetic procedures. The cream contains growth factors and peptides to help define the contours of the face and give it a more youthful and firm appearance. It has strong repairing properties thanks to the repair complex based on amino acids and ATP.

The cream is rich and melting at application with an ice-cream texture, ultra-comfortable with nutritive after-feel. The scent is fresh and energizing, composed of a mixture of citrus fruits. The cream has to be applied at night on a cleansed skin and can be used in synergy with serums.

How to use?

Wash your face before you apply your night cream. Collect a dime-size amount of the cream. Dab it onto your face. Follow an upward, circular direction to massage the cream on to your skin. Do not apply the night cream on your eye-lids.

Scent:

Ceylan tea, fresh citrics.

Product texture:

The meso repair creams combine 2 formulations technologies. It is a water-in-oil cream with micro emulsion technology and ice cream texture for a maximal soothing and refreshing feel at application. The formulation is based on a high content of wax with a melting point similar to the skin temperature. The texture is stable at low temperature and can be stored in fridge for an even more refreshing sensation. The selected wax create a long lasting protective film to protect the skin. Nevertheless the after-feel is very light and non greasy.

Hyaluronic drops

Intensive moisturizing cream with hyaluronic acid, water drop technology.

XS hyaluronic acid.

Description:

Refreshing cream formulated with XS hyaluronic acid for a maximal skin hydration. The texture is surprising as it is extremely refreshing and highly moisturising at application, but at the same time a protective and nutritive film remains at the surface of the skin for many hours. The film avoid the transepidermic water loss and preserve an intense skin comfort and moisture.

This water-in-oil cream provides extreme moisture. It contains XS hyaluronic acid, a very low molecular weight form. Hyaluronic Acid is the most hydrated biopolymer known. In living tissues it serves as a connective tissue organizer and water holding substance. The sodium hyaluronate is coming from a biotechnical safe process; it is free of contaminants and GMO. It is a breakthrough in anti-aging properties with increased permeation through the skin compared to high molecular weight hyaluronic acid. It rejuvenates the skin by improving its viscoelastic properties and significantly decreases deep wrinkles.

The exclusive water-drop formulation reduces immediately fine lines and plump-up the skin. Especially designed for all skin types, the hyaluronic drops is an incredible moisturiser. The scent in the product is fresh and vegetal with note of green leafs, grass and fruits.

Scent:

Energetic, green, fresh leaves.

Product texture:

A water-in-oil cream based on Japanese technology. The cream has a matt aspect and consist in a very high quantity of water dispersed in ultra fine drops in an oil phase. The result is a cream that breaks at the contact of the skin releasing water drops. The water drops provide a unique refreshing sensation at application, nevertheless after application the skin feels nourish. This is due to the external phase that is composed of oil and that creates a lipid protective film on the skin.

Radiance cream

Light refreshing gel cream with intense results on skin tone and pigmentation.

Hexyl-resorcinol, niacinamide.

Description:

Refreshing cream formulated with active ingredients derived from aesthetic medicine for an intensive skin lightening effect. A fresh and unique texture with a mat skin finish. The scent in the product is based on mandarin essential oil.

This soft gel cream contains hexylresorcinol and niacinamide boosted by a transdermal delivery system. It quickly reduces the pigmented spots, blemishes and pigmentation. The formula offers an extreme comfort during and after application with a light and silky skin feeling. The cream will suit all skin types.

Hexylresorcinol was proven to be four times more effective compare to hydroquinone, it works by modulating multiple sites in the melanogenesis pathway. It shows also other surprising functions as it increases levels of glutathione and stimulates the antioxidant defense enzymes - glutathione peroxidase and glutathione reductase.

Niacinamide is an excellent active ingredient to improve the skin moisture as it upregulates the expression of aquaporin-3 (AQP3). But in this product it shows a synergic effect with hexylresorcinol to enhance the skin tone and reduce pigmentation.

How to use?

Wash your face before you apply your night cream. Collect a dime-size amount of the cream. Dab it onto your face. Follow an upward, circular direction to massage the cream on to your skin. Do not apply the night cream on your eye-lids.

Scent:

Mandarin essential oil.

Product texture:

A gel cream texture with a matt finish that decrease the skin temperature at application. This type of texture is highly moisturising and refreshing and will suit oily or combination skin types. It also creates a "blur effect" on the skin to unify and give more luminosity to the skin tone.

Probiotix cream

Ultra nourishing cream for dry and sensitive skin to restore the ecoflora and biological defenses.

XS hyaluronic acid, probiotix complex.

Description:

Water-in-oil rich and nutritive cream to treat dry and sensitive skin. The texture of the probiotix cream is ultra soft and smooth and provides intense nutrition to the skin. The scent in the product is based on mandarin essential oil. The water phase of the probiotix cream is also isotonic and balanced in salt to optimize the skin moisture and water transfer into the skin.

The pre/probiotic complex is made of α -glucooligosaccharides, obtained by enzymatic synthesis from vegetable substrates, made of 100% pure plant juice, rich in β -fructooligosaccharides, obtained by cold pressing of jicama or yacon tubers, and made of Lactobacillus Probiotic Bacteria, which is inactivated by tyndallization and freeze-dried. This product is used for the optimization of the cutaneous ecoflora, the strengthening of biological defences, and the improvement of the skin radiance by a restructuring and smoothing effect.

Thanks to its unique structure, the cream promotes the balance of the skin microbiota by acting as a substrate for commensal bacteria and by strengthening the skin's natural defenses.

Thanks to its richness in natural sugars (GOS and FOS), it improves the appearance and comfort of the skin, thus enhances the radiance of the complexion and attenuates the sensations of discomfort characteristic of sensitive and dry skin.

It contains also XS hyaluronic acid, a very low molecular weight form. Hyaluronic Acid is the most hydrated biopolymer known. In living tissues it serves as a connective tissue organizer and water holding substance. The sodium hyaluronate is coming from a biotechnical safe process; it is free of contaminants and GMO. It is a breakthrough in anti-aging properties with increased permeation through the skin compared to high molecular weight hyaluronic acid. It rejuvenates the skin by improving its viscoelastic properties and significantly decreases deep wrinkles.

Scent:

Mandarin essential oil.

Product texture:

Oil-in-water emulsion with cushion effect and extreme comfort at application. These types of emulsions are better adapted for dry and sensitive skin to provide nutrition, protection and diffuse water on a prolonged period of time to the skin.

Hyaluronic moisturizer

Cooling anti-ageing and anti-wrinkles moisturizer.

XS hyaluronic acid.

Description:

Formulated with hyaluronic acid derived from aesthetic medicine for a complete anti-ageing effect and wrinkles reduction. A fresh and unique texture with ultra-soft skin finish. This is a melting micro-emulsion, it contains low molecular weight hyaluronic acid to hydrate the skin and reduce the appearance of wrinkles.

It contains also XS hyaluronic acid, a very low molecular weight form. Hyaluronic Acid is the most hydrated biopolymer known. In living tissues it serves as a connective tissue organizer and water holding substance. The sodium hyaluronate is coming from a biotechnical safe process; it is free of contaminants and GMO. It is a breakthrough in anti-aging properties with increased permeation through the skin compared to high molecular weight hyaluronic acid. It rejuvenates the skin by improving its viscoelastic properties and significantly decreases deep wrinkles.

How to use?

Wash your face before you apply your night cream. Collect a dime-size amount of the cream. Dab it onto your face. Follow an upward, circular direction to massage the cream on to your skin. Do not apply the night cream on your eye-lids.

Scent:

Ceylan tea and fresh citrics.

Product texture:

Touch and feel are important factors when buying beauty and personal care products. We attach great importance to the texture and comfort of a formulation, focusing on how it feels, and making a link between sensoriality and functionality. Our moisturizer has unexpected sensoriality, bright, creamy and rich appearance, evanescent feel (light & thin) and the scent is fresh and energizing, composed of a mixture of citrus fruits.

The emulsion offer ultra-soft touch and easy spreadability on the skin. These characteristics can be attributed to the very fine and homogeneous dispersion of the oil droplets. The emulsion is homogeneous, with an average droplet size in the range of one micron. Yet the feel is light and cool, offering a melting sensation when the product is applied onto the skin, the film residue is fine but noticeable, non-greasy and non-tacky.

PPC+ cream

Reduction of cellulite and fat deposits.

Transdermal PPC, L-carnitine, caffeine.

Description:

Formulated with PPC, L-carnitine and caffeine as used in mesotherapy treatments to reduce fat deposits and cellulite. A fresh and unique texture with ultra-soft skin finish. This is a melting micro-emulsion.

Cellulite involves changes in the dermis and subcutaneous tissue caused by the irregular proliferation of fat cells, the so-called adipocytes. Cellulite is associated with lifestyle, diet and the use of different types of pharmaceuticals. Nowadays injected PPC is an effective treatment to reduce cellulite and fat deposits but it involves important discomfort and potential side effects. We created a perfect alternative by creating a transdermal PPC encapsulated in vesicles of approx. 100 nm in diameter, three synergistically acting active ingredients are contained - L-carnitine, caffeine and sodium deoxycholate - which up to now have been used mainly in invasive aesthetic medicine treatments. These substances were selected in such a way as to most effectively reduce fat tissue, at the same time improving skin elasticity and firmness at the site of application, which have been proved in many studies. L-carnitine speeds up the energetic metabolism of fatty acids and acts as a detoxificant for skin cells. Sodium deoxycholate effectively liquefies the cell membranes of fat cells, the so-called adipocytes, allowing the release of the unnecessary products of metabolism (lipolysis). Caffeine stimulates micro-circulation, thus strengthening the action of the other active ingredients. Additionally, it speeds up lipolysis, leading to an increase in the blood level of glycerol and free fatty acids.

How to use?

Apply morning and night on the target area during 4 to 6 weeks.

Scent:

Mandarin essential oil.

Product texture:

Touch and feel are important factors when buying beauty and personal care products. We attach great importance to the texture and comfort of a formulation, focusing on how it feels, and making a link between sensoriality and functionality. Our body cream has unexpected sensoriality, bright, creamy and rich appearance, evanescent feel (light & thin) and the scent is 100% natural and based on mandarin essential oil.

The emulsion offers ultra-soft touch and easy spreadability on the skin which is important for a body product. These characteristics can be attributed to the very fine and homogeneous dispersion of the oil droplets. The emulsion is homogeneous, with an average droplet size in the range of one micron. Yet the feel is light and cool, offering a melting sensation when the product is applied onto the skin, the film residue is fine but noticeable, non-greasy and non-tacky.

Eye sorbet

Refreshing eye cream to reduce bags, dark circles and wrinkles.

Cross-linked hyaluronic acid, 5 growth factors, folic acid, acetyl glutamine.

Description:

An ultra-refreshing eye cream formulated with active ingredients derived from aesthetic medicine for a complete anti-wrinkles effect. A surprising texture erasing wrinkles in a minute. The scent is fresh and energizing, composed of a mixture of citrus fruits. Most of the technology in this product is based on this exclusive texture that has the ability to reduce the skin temperature and create a soft-focus or blur effect on wrinkles to hide their appearance.

The reduction of the skin temperature stimulates the micro-circulation to drain the eye contour in order to reduce eye bags and dark circles. It is supported by a blend of the most advanced active ingredients to moisturize and reduce the wrinkles on this delicate area.

- Excellent sensorial properties with unique texture, Interesting change of texture during application. Non tacky moist feeling.
- Immediate reduction of fine lines and wrinkles by blur effect similar to makeup primer.
- Superb hydration properties, the osmotic system incorporated creates moisture retention in the skin.

How to use?

Wash your face before you apply your eye cream. Dab it onto your eye contour. Follow an upward, circular direction to massage the cream.

Scent:

Ceylan tea and fresh citric.

Product texture:

A sorbet texture with a matt finish that decrease the skin temperature at application. This type of texture is highly moisturising and refreshing. It also creates a "blur effect" on the skin to unify and give more luminosity to the skin tone.

Meso shield 50

High efficiency daily protection with ultra light texture.

SPF50

Description:

A specific protective cream formulated for post aesthetic medicine procedures. A surprising light texture for a maximum protection against UVA/UVB. It is conditioned in a convenient airless to be carried all day. This protective daily wear is an innovation at different levels.

The formulation creates a long-lasting film over the skin resisting to sweating, providing a base for make-up and avoiding the penetration of the sunscreens into the skin. Does not sting the eyes and suit even the most sensitive skins. The scent is based on Aloe Vera providing freshness and relaxation.

The most important factor in UV protection products is that they ensure the same level of protection against UVA and UVB without breach in the radiation spectrum to leave certain types of UV reach and damage the skin. An "ideal sunscreen" must perform like a neutral density filter with the same protection at any wavelength.

We gave a very particular care in our formulation by using in synergy 4 types of UV screening ingredients in order to reach the best ratio and protection against all types of UV.

Our SPF is also using the latest innovations without any ingredient that could irritate the skin or endocrine modulators. The efficiency of our SPF is extremely high compare to other SPF with an effective ratio of 2.8 point of SPF for 1% of UV filter.

How to use?

Wash your face before you apply your day cream. Collect a dime-size amount of the cream. Dab it onto your face. Follow an upward, circular direction to massage the cream on to your skin. Do not apply the on your eye-lids.

Scent:

Aloe Vera, fresh and light.

Product texture:

Water-in-oil emulsion with a light texture for a high protection SPF. Does not leave the skin oily and white after application.

HA deep filler

Topical deep wrinkles filler.

Cross-linked hyaluronic acid.

Description:

A product that was design to apply after dermal fillers injections. The products contains cross-linked hyaluronic acid, similar to the one injected by doctors to recreate skin volumes and fill wrinkles.

The formulation is a light and silky touch serum with a long lasting after feel. It also incorporates soft-focus technology to reduce the appearance of wrinkles and enlighten the skin tone. The scent is fresh and energizing, composed of a mixture of citrus fruits.

Crosslinked hyaluronic acid derived from naturally sourced Hyaluronic Acid. This active ingredient is commonly used in dermal fillers injections. It appears like an elastic gel with high viscosity able to form invisible biological film on the skin surface with various effects, such as moisturizing, protection and wrinkles filling. The crosslinked hyaluronic acid forms a 3D “breathable” layer on the surface of the skin that improves the skin barrier function, reduces the water evaporation and prevents the skin damage caused by external aggressions like UV ray, pollution, etc.

The viscosity of a crosslinked hyaluronic acid solution is 3 times higher compare to conventional hyaluronic acid solution at the same concentration, which indicates that it can bind more water molecules because of its crosslinked structure. It behaves like a “micro reservoir” delivering continuously water to the skin.

How to use?

Wash your face before you apply your serum. Collect a dime-size amount of the product. Dab it onto your face. Follow an upward, circular direction to massage the serum on to your skin.

Scent:

Ceylan tea and fresh citric.

Product texture:

The specific composition of this water-in-oil emulsion leads to optimal emulsion stability while enabling to provide a specific smooth and velvety skin feel. The emulsion has a very bright and shiny appearance due to the fine emulsion technology used. The result is a very pleasant cream, fresh at application and easily absorbed by the skin.

Retinol 1.0

Intense treatment against wrinkles and photo-ageing.

Stabilized pure retinol 1%

Description:

Highly concentrated serum with pure form of retinol. This exclusive formula targets wrinkles and photo-ageing. After few days of application the skin looks younger with less wrinkles and a unified skin tone. The scent is fresh and energizing, composed of a mixture of citrus fruits.

This intensive treatment have to be used 2 to 3 times per week on a period of 10 to 15 days at night. If the skin feels sensitive and shows signs of exfoliation stop the treatment for few days. Always combine the treatment with retinol 1.0 with the Meso shield during the day.

The innovation in this product is the way we arrived to stabilized the retinol which in general is very hard to maintain active in a formulation for a long time. We are using a specific blend of oils in which retinol is protected from oxydation. Move over the formulation incorporates a transdermal booster to increase the penetration of retinol in the deepest layers of the epidermis.

Retinol (Vitamin A) efficacy has been demonstrated in numerous scientific studies, confirming its broad range of action across all major skin care applications including reduction of pigment spots and wrinkles as well as improvement of skin elasticity and smoothness. Retinol improves cell renewal, reduces collagen degradation and normalizes keratinization. It regenerates skin and provides a smooth, firm and radiant look. Dermatologists and other experts have been relying for decades on the many positive effects which Vitamin A has in cosmetic products.

How to use?

Wash your face before you apply your serum. Collect a dime-size amount of the product. Dab it onto your face. Follow an upward, circular direction to massage the serum on to your skin. Avoid the eye contours.

Scent:

Ceylan tea and fresh citric.

Product texture:

The specific composition of this water-in-oil emulsion leads to optimal emulsion stability while enabling to provide a specific smooth and velvety skin feel. The emulsion has a very bright and shiny appearance due to the fine emulsion technology used. The result is a very pleasant cream, fresh at application and easily absorbed by the skin.

Vitamin C 5.0

Intense treatment against photo-ageing.

ET-vitamin C 5%

Description:

Highly concentrated serum with a stable form of vitamin C. This exclusive formula targets photo-ageing and free radical damages. After few days of application the skin tone looks even and brighter. The scent is based on natural orange peel essential oil.

This intensive treatment have to be used 2 to 3 times per week on a period of 10 to 15 days at night. If the skin feels sensitive and shows signs of exfoliation stop the treatment for few days. Always combine the treatment with the Meso shield during the day.

The innovation in this product is based on a new form of vitamin C that i stable in the formulation over time and avoid usual sticky after-feel of products containing vitamin C.

How to use?

Wash your face before you apply your serum. Collect a dime-size amount of the product. Dab it onto your face. Follow an upward, circular direction to massage the serum on to your skin. Avoid the eye contours.

Scent:

Orange essential oil.

Product texture:

The specific composition of this water-in-oil emulsion leads to optimal emulsion stability while enabling to provide a specific smooth and velvety skin feel. The emulsion has a very bright and shiny appearance due to the fine emulsion technology used. The result is a very pleasant cream, fresh at application and easily absorbed by the skin.

Hyaluronic cryo-mask

Skin cooling anti-ageing and anti-wrinkles mask.

XS hyaluronic acid.

Description:

Formulated with XS hyaluronic acid derived from aesthetic medicine for a complete anti-ageing effect and wrinkles reduction. A fresh and unique texture with ultra-soft skin finish.

The cryo-mask incorporates skin cooling technology, the formula is able to decrease the skin temperature up to 2 degree after application. The scent is fresh and energizing, composed of a mixture of citrus fruits.

This formula provides extreme moisture, it contains XS hyaluronic acid. The low molecular weight hyaluronic acid sourced from aesthetic medicine products have the ability to penetrate deeper in the epidermis compare to other types of hyaluronic acid. It acts like a natural sponge to bind high amounts of water to provide moisture and fill deep wrinkles. Hyaluronic acid also stimulates the fibroblast to produce collagen and protect the skin from ageing, skin sagging and loss of firmness.

How to use?

Wash your face before you apply the mask. With a brush or the fingers apply a generous layer on the face, neck and décolleté. Leave on for about 10 minutes and remove the excess with a dry cotton pad. Do not apply the mask on your eye-lids.

Scent:

Ceylan tea and fresh citric.

Product texture:

A cooling texture with a matt finish that decrease the skin temperature at application. This type of texture is highly moisturising and refreshing and will suit oily or combination skin types. It also creates a “blur effect” on the skin to unify and give more luminosity to the skin tone.

Lift sleeping mask

Nutritive sleeping mask to reduce wrinkles and skin sagging.

XS Hyaluronic acid, 5 growth factors, folic acid, acetyl glutamine.

Description:

Formulated with hyaluronic acid, growth factors, glutamine and folic acid derived from aesthetic medicine for a complete anti-ageing effect and wrinkles reduction. A rich water in oil texture for intense over-night nutrition. This formula provides extreme richness, it contains hyaluronic acid, growth factors, folic acid and acetyl glutamine. During the night the skin is not expose to external factors and it can be highly nourished and regenerated. The scent in the product is 100% natural and based on mandarin essential oil.

How to use?

Wash your face before you apply the mask. With a brush or the fingers apply a generous layer on the face, neck and décolleté. leave-on during the night and wash your face in the morning. Do not apply the mask on your eye-lids.

Scent:

Mandarin essential oil.

Product texture:

Rich water-in-oil cream with bright and fine texture. It incorporates a specific blend of oils to create a long lasting protective film over the skin. At application the texture feels light and easy to apply, the after-feel is a long lasting nutritive sensation.

Octyldodecyl myristate a liquid emollient, non comedogenic, It provides a rich feel and improves the spreadability on the skin. Certified natural by ECOCERT and RSPO Mass Balance.

Myristyl lactate is a lipid with low fatty character, a high quality ester specifically developed for personal care and pharmaceutical applications. It is based on natural fatty acids, offering many functional benefits.

Meso-T mask

Tissue mask to create sterile masks.

Description:

MESO-T masks are compacted cellulose & silk masks. They are activated just before application by adding 15 to 25 ml sterile saline solution and 1 to 2 ml of meso solution. It is the perfect mask for post medical treatment. The mask is not containing any preservative or chemical. The mask can be personalized for each treatment by simply activating it with the desired meso solution. The mask provides an extreme refreshing effect and soothes the skin.

How to use?

The products can be applied after any type of skin needling or electroporation treatment.

Areas: face, body.
